Pavel Angelov

Full Stack Developer · Laravel · Vue/Nuxt · React

Varna, Bulgaria +359 88 920 2512 angelovpavel0@gmail.com [portfolio link]

SUMMARY

Full stack developer building web and mobile products with Laravel, Vue/Nuxt and React. I take features from database design through deployment, with hands-on experience in real-time chat, Stripe subscriptions, Bulgarian bank payments and LLM-powered features. I work AI-first with Claude Code and Cursor and review everything before it ships.

EXPERIENCE

Full Stack Developer — Touchpoint EOOD

Apr 2026 – Present

TouchUp — AI proposal platform · touchupapp.com React · TypeScript · Laravel · Stripe · Claude API

- Built Stripe subscription billing: multiple products and prices, monthly and annual plans, and pricing managed from the admin panel.
- Co-developed AI offer generation: the team describes the job, and Claude drafts a structured offer from the company's pricing knowledge base. Used in-house daily since launch.

Palace of Culture Pernik — ticketing · palacepernik.com WordPress · WooCommerce · FooEvents · Borica

- Led development of the custom seating plugin used daily for online and box-office sales: interactive seat maps, per-seat and age-category pricing, and seats released automatically when a payment fails.
- Integrated Borica card payments end to end, from technical setup to correspondence with the bank. Configured on-site ticket printing at the box office.
- Wrote the client's staff guides for event setup, POS sales and mobile ticket scanning, and provide ongoing support.

NIAM — C2C marketplace (pre-launch) Laravel · Nuxt · Reverb · Capacitor · OpenAI

- Built the real-time chat single-handedly: messaging, typing indicators and read receipts over WebSockets (Laravel Reverb and Echo).
- Co-developed AI listing moderation that uses OpenAI text and vision models to flag counterfeit, forbidden or mismatched items for admin review.
- Contributed across the web app and the iOS/Android apps: listings, search, offers, accounts and the Filament admin panel.

Also: custom WordPress themes and features for 5 client sites, including joytaxi.bg, camping.bg and venidyacht.com.

Upskilling & certifications

Feb 2024 – Mar 2026

Completed the SoftUni ReactJS course and earned the AWS Certified Cloud Practitioner certification. Deployed personal projects to Cloudflare, AWS, Cloudways and cPanel hosting.

Full Stack Developer — Codixis Bulgaria

Jan 2023 – Feb 2024

- Contributed to the previous web platform of the Muséum national d'Histoire naturelle, Paris (React, Next.js, Symfony).
- Built REST APIs with API Platform for CMS-driven features, with backend logic in Symfony and Doctrine ORM.

SKILLS

Backend: PHP 8, Laravel, Symfony, REST APIs, Sanctum, queues, Filament

Frontend: TypeScript, Vue 3, Nuxt, React, Next.js, Tailwind

AI: Claude API, OpenAI API, Claude Code, Cursor

Payments: Stripe (Billing, subscriptions, webhooks), Borica

Real-time & mobile: Laravel Reverb, WebSockets, Capacitor

Deployment: AWS, Cloudflare, Cloudways, cPanel, Git

WordPress: custom plugins and themes, WooCommerce

Data: MySQL, Eloquent, Doctrine ORM

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02), 2025

All badges on Credly

EDUCATION

Software University (SoftUni)

JavaScript Web Developer Program, 2021–2023 · ReactJS course

LANGUAGES

Bulgarian — native

English — fluent (C1–C2)
