SUMMARY

Full stack developer (Laravel, Vue/Nuxt, React) who likes the unglamorous parts of shipping: bank payment integrations, real-time chat, subscription billing and the edge cases that break them. I take features from database design through deployment, work AI-first with Claude Code and Cursor, and review every line before it ships.

EXPERIENCE

Full Stack Developer · Touchpoint EOOD — Apr 2026 – Present

TouchUp · AI proposal platform · touchupapp.com — React · TypeScript · Laravel · Stripe · Claude API

- Built Stripe subscription billing: multiple products and prices, monthly and annual plans, and pricing managed from the admin panel.
- Co-developed AI offer generation: the team describes the job, and Claude drafts a structured offer from the company's pricing knowledge base. Used in-house daily since launch.

Palace of Culture Pernik · ticketing · palacepernik.com — WordPress · WooCommerce · FooEvents · Borica

- Led development of the custom seating plugin behind daily online and box-office sales for the theatre's 80-seat hall: interactive seat maps, per-seat and age-category pricing, and seats released automatically when a payment fails. Shows have regularly sold out since launch in September 2026.
- Integrated Borica card payments end to end, from technical setup to correspondence with the bank. Configured on-site ticket printing at the box office.
- Wrote the client's staff guides for event setup, POS sales and mobile ticket scanning, and provide ongoing support.

NIAM · C2C marketplace (pre-launch) — Laravel · Nuxt · Reverb · Capacitor · OpenAI

- Built the real-time chat single-handedly: messaging, typing indicators and read receipts over WebSockets (Laravel Reverb and Echo), shared across web, iOS and Android.
- Co-developed AI moderation that screens every new listing with OpenAI text and vision models, flagging counterfeit, forbidden or mismatched items for admin review.
- Contributed across the web app and the iOS/Android apps: listings, search, offers, accounts and the Filament admin panel.

Also: Burgas Airport Taxi, a 5-language Astro site with 20 generated destination pages (burgas2airport.com). Built joytaxitransfers.com and co-developed joytaxi.bg, including SEO for both; custom WordPress features for drvilyanamaleva.com and venidyacht.com.

Technical Support (English) · ResultCX — Mar 2025 – Mar 2026

- Provided technical support in English to international customers, troubleshooting issues and explaining fixes to non-technical users.

Full Stack Developer · Codixis Bulgaria — Jan 2023 – Feb 2024

- Contributed to the web platform of the Muséum national d'Histoire naturelle, Paris (since replaced), built with React, Next.js and Symfony.
- Built REST APIs with API Platform for CMS-driven features, with backend logic in Symfony and Doctrine ORM.

SKILLS

Backend: PHP 8, Laravel, Symfony, REST APIs, Sanctum, queues, Filament

Frontend: TypeScript, Vue 3, Nuxt, React, Next.js, Tailwind

AI: Claude API, OpenAI API, Claude Code, Cursor

Payments: Stripe (Billing, subscriptions, webhooks), Borica

Real-time & mobile: Laravel Reverb, WebSockets, Capacitor

Deployment: AWS, Cloudflare, Cloudways, cPanel, Git

WordPress: custom plugins and themes, WooCommerce

Data: MySQL, Eloquent, Doctrine ORM

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02), 2025

All badges on Credly

EDUCATION

Software University (SoftUni)

JavaScript Web Developer Program, 2021–2023 · ReactJS course, 2024

LANGUAGES

Bulgarian: native

English: fluent (C1)
